

We have unfortunately had to close the doors to our children this week. We will be continuing to provide care for the Key Person's and their families. We will update all parents as and when we receive information.

Please use our service responsibly, we are open for key workers' children. it is important to follow the government guidelines and if there are any other alternate options to minimise the risk of spreading this disease then they should be implemented.

This is for the safety of you, your children, the other children and our staff!!!
